

## SUBSEA CLUTCH TOOL | TECHNICAL SPECIFICATION

|                                |  |
|--------------------------------|--|
| <b>Torque Range</b>            | 40-200NM                               |
| <b>Sockets</b>                 | CLASS 1-2, CLASS 3 & CLASS 4           |
| <b>Paddle valve tool setup</b> | L: 70mm W: 31mm (Dim. can be modified) |

The manipulator clutch tool is for operation on low torque valves without the need for a hydraulic driven torque tool.

Supplied with 40-100NM and 80-200NM clutches that is easily adjusted to the required max torque before deployment.

- Quick & easy torque adjustment.
- Quick & easy change between interfaces.
- Compact and lightweight.
